

Context

Since its foundation in 1844 the Spanish Guardia Civil has been participating in the resolution of the main security issues affecting Spain as a State at national and international level. The experience gained over these years, and especially the know-how with integrity and spirit of service to citizens is becoming increasingly of interests as a benchmark for other law enforcement agencies, and required by international bodies such as the EU, which supports the development of institutional strengthening and stability projects in our external borders and other geopolitical scenarios.

Goals

- To contribute to the objectives of the external dimension of the Area of Freedom, Security and Justice in the EU, spreading out the knowledge of the EU legislative instruments and high technology useful in other geopolitical areas of interest for the security in Europe.
- To extrapolate the best practices and experiences developed in the police institutions of EU Member States, as the Guardia Civil and others in the EU, to law enforcement agencies playing an active role in our neighborhood
- To promote awareness of experiences of the European Higher Education Area (EHEA) on security topics in the EU's external borders
- To encourage the development of forums for exchanging experiences in capacity building, and governance.

Grant

This project is granted by the European Commission.
